

microcell surface peel

A once-a-week, non-irritating exfoliant that gently but effectively removes dead skin cells and debris from the surface of the epidermis, resulting in less blemished, smoother and more refined skin.

Periodic deep exfoliation of dead skin cells is essential to age management. Dead cell build-up on the skin creates a less-youthful, discolored complexion and fine lines.

microcell surface peel restores a fresh and glowing appearance to the skin without the downtime associated with more invasive peels (e.g. laser resurfacing, micro-dermabrasion and heavy acid peels).

KEY INGREDIENTS:

Lactic acid

Lactic acid is an alpha-hydroxy acid derived from milk or molasses. It aids in exfoliation by dissolving the links from the dead surface cells.

Glycolic acid

Another alpha-hydroxy acid that draws water into dead skin cells (hydroscopic action), thus aiding exfoliation.

Citric acid

A chondroitin sulfate that helps bind moisture to the new healthy cells.

Ascorbic acid

Vitamin C, which is essential to collagen production. It is also a free radical scavenger that helps normalize pigmentation and assist in tissue repair.

available in 2 oz or 6 oz

sans âge age management system

sans âge has created a simple but effective **age management system** addressing the key skin care fundamentals. The system is derived from product protocols used in professional clinics worldwide and is formulated to be used by everyone regardless of gender, race, color, or age. The core products (included in this brochure) are essential to any skin care regimen.

sans âge sources the most active botanical and other organic ingredients available worldwide. The skin recognizes these ingredients, thus providing maximum benefits. Only safe preservatives are used which are paraben and urea free, and none of the products contain propylene glycol or lauryl/laureth sulfates.

The twice daily, three-step core regimen forms the basic **age management system**, creating an optimal environment to restore and protect your skin. This promotes normal cell functioning, preparing your skin for additional sans âge target-area products formulated to address specific needs or conditions.

sans âge doesn't focus on one single product or miracle ingredients. It has, instead, created a lifestyle regimen, the backbone for a simple, yet effective **age management system** for your skin.

The sans âge **core regimen** includes:

sans âge complete cleanser or hydro cleanser

Provides a deep cleansing of the skin, removing dead cells, debris and toxins.

sans âge moisture mantle

Re-establishes the moisture barrier of the skin, instantly improving its firmness and bounce.

sans âge total delivery crème

Provides trans-epidermal delivery of the nutrients that your fresh, new cells recognize, including anti-oxidants, proteins, amino acids, and vital immune stimulators.

Additionally, as an added bonus, the **core regimen** also contains:

sans âge microcell surface peel

Non-invasively removes excess dead skin cells and debris, restoring a fresh, glowing appearance without the downtime associated with other types of peels.

about sans âge

sans âge was founded upon the 40 year-old science behind the highly acclaimed Danné Montague-King professional clinic treatments offered throughout the world.

The research technicians at sans âge believe there is no such thing as "anti-ageing", an industry buzz-word for many years or so-called miracle ingredients. Instead, our team focuses on AGE MANAGEMENT following the theories of internationally recognized skin guru Danné King.

If there would be one person to be credited in turning the history of professional skin therapy into what it is today, Danné would be that person. He has inspired doctors and therapists in over 20 countries to re-evaluate how they treat their clients and to avoid the hype that often accompanies much of the marketing of products and machines.

sans âge is a French phrase that translates to "without age" or "ageless". We at sans âge believe that anyone can be on the road to ageless skin by using the proper products in the appropriate way. Everyone deserves the opportunity to look better, regardless of age. Our credo: "age doesn't matter – looking good does".

sans âge®

Beverly Hills

age management system core regimen

complete cleanser

(normal to oily skin)

A non-alkaline cleanser that clears the skin of damaging toxins, excess sebaceous oil and dead cells that block skin pores. Establishes the optimal environment for maximum absorption of your other sans âge products.

complete cleanser leaves your skin thoroughly cleansed without stripping away age-fighting natural secretions. It eliminates congestion in large pores and leaves your skin fresh and invigorated!

KEY INGREDIENTS:

Olefin sulfonate and cocamidepropyl betain

Sourced from coconut oil, they are gentle surfactant ingredients that lift and remove dirt from the skin by allowing oil and water to mix, thereby reducing surface tension.

Salicylic acid

A mild acid that occurs in wintergreen leaves, sweet birch and other selected plants. Salicylic acid improves the texture of the skin by loosening and removing the top dead skin cells which help open and clean out clogged pores. It is also a known anti-bacterial agent.

Yucca schidera extract

A natural cacti succulent known to the American Indians decades ago as "soap root", yucca has its own cleansing powers and is anti-bacterial on the skin.

Aloe barbadensis

A plant extract that helps soften skin and reduce irritation; also known for its healing and anti-inflammatory properties.

available in 2 oz or 8 oz

hydro cleanser

(dry or sensitive skin)

A mild non-sensitizing cleanser that gently cleanses the skin of damaging toxins and dead cells without drying. *hydro cleanser* is specifically formulated for individuals who have skin with lower dermal hydration (dry skin) or sensitive skin.

hydro cleanser provides additional hydration while leaving the skin smooth and soft; prepares the skin for other sans âge products.

KEY INGREDIENTS:

Olefin sulfonate and cocamidepropyl betain

Sourced from coconut oil, they are gentle surfactant ingredients that lift and remove dirt from the skin by allowing oil and water to mix, thereby reducing surface tension.

White oak and birch extracts

Natural surfactants that help clean and open pores; also has anti-inflammatory, astringent and antiseptic qualities.

Yucca schidera extract

A natural cacti succulent known to the American Indians decades ago as "soap root", yucca has its own cleansing powers and is anti-bacterial on the skin.

Soybean oil

A botanical lipid containing eight essential amino acids providing cell nutrition and a barrier to moisture loss.

available in 2 oz or 8 oz

moisture mantle

A moisture spray containing hand-soaked herbs and botanicals that establish optimal skin hydration while delivering essential nutrients. It enhances proper skin function, thereby providing a fuller and firmer appearance.

moisture mantle restores the moisture barrier necessary for healthy, youthful looking skin. It is as close as possible to the same natural moisturizer given to us by nature when we are very young. When used after cleansing, it provides essential nutrients that can be carried deep into the epidermis.

Formulated to be used at any time of the day or night, *moisture mantle* is occluded into the skin for hours when applied under *total delivery*, enhancing and prolonging the age management effects of both products.

KEY INGREDIENTS:

Kelp

Rich source of minerals and potassium which help prevent infection.

Saarasparilla

Used against many skin diseases including psoriasis.

Black cohosh

Has calming, digestive, antiseptic and anti-fungal properties.

Saw palmetto

Contains many rich fatty acid esters. Helps to stop sebum overflow.

Licorice extract

An anti-viral that may help heal dermatitis and inhibit melanin production.

Sage

An anti-bacterial, anti-fungal, anti-stress and astringent.

Mullein extract

A natural skin antibiotic and anti-irritant.

Fenugreek

Helps to reduce inflammatory conditions such as eczema, acne, and sunburn.

Hops

Has super anti-oxidants and is a calming agent on the skin.

available in 2 oz or 4 oz

total delivery

(betaglukan crème)

An advanced nutrient crème containing betaglukan that enhances the skin's immune function in fighting free radicals while providing a moisture balancer to combat the ravages of age.

There are many anti-ageing crèmes on the market which make the claim that they contain state-of-the-art ingredients, however, *total delivery* has a true trans-epidermal delivery system which is vital to any real and long-lasting results.

The scientists behind sans âge have mastered the trans-epidermal delivery system by using proteins, amino acids and other nutrients that new skin cells require to stay alive longer, managing our skin against the attacks of time and environmental surroundings.

KEY INGREDIENTS:

Betaglukan

A yeast cell extract which has anti-inflammatory properties and boosts the skin's immune system by stimulating the Langerhans cells. It is especially effective against photo damage from the sun.

Shea butter

An anti-inflammatory ingredient that helps promote new cell growth and raises tissue hydration.

Safflower oil

A natural oil used in base crèmes and lotions as a hydroscopic lipid.

Pumpkin oil

A natural anti-oxidant oil that is rich in vitamin A.

Tocopherol

A vitamin E complex, the most powerful anti-oxidant for the skin.

available in 1 oz or 2 oz
