eye revise

ABOUT sans âge

sans âge was founded upon the 40 year-old science behind the highly acclaimed Danné Montague-King professional clinic treatments offered throughout the world.

The research technicians at sans âge believe there is no such thing as "anti-ageing", an industry buzz-word for many years, or so-called miracle ingredients. Instead, our team focuses on AGE MANAGEMENT following the theories of internationally recognized skin guru Danné King.

If there would be one person to be credited in turning the history of professional skin therapy into what it is today, Danné would be that person. He has inspired doctors and therapists in over 20 countries to re-evaluate how they treat their clients and to avoid the hype that often accompanies much of the marketing of products and machines.

sans âge is a French phrase that translates to "without age" or "ageless". We at sans âge believe that anyone can be on the road to ageless skin by using the proper products in the appropriate way. Everyone deserves the opportunity to look better, regardless of age. Our credo: "age doesn't matter – looking good does".

sans âge eye revise

"With so many eye products on the market, I saw no reason to create something that was basically like every other company's product. This included the peptide craze and the alleged 'Better than BOTOX® crèmes'. Thinking from a scientific and consumer perspective, I had to create a product that would provide an immediate **VISIBLE DIFFERENCE** while simultaneously providing a **LONG-TERM THERAPEUTIC EFFECT!**

After interviewing numerous men and women in the professional and lay arenas for consumer feedback, I developed the formula we call **sans âge eye revise.**"

-Danné King (co-founder of sans âge)

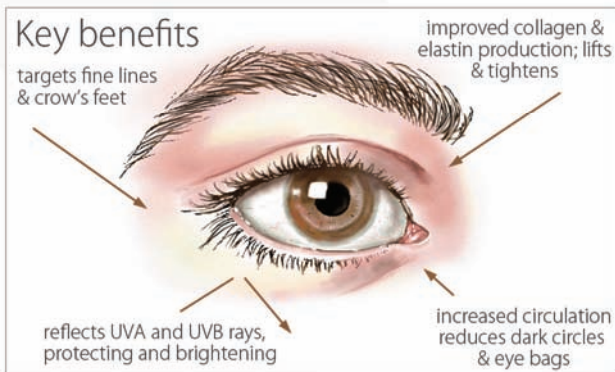

sans âge **eye revise** offers a synergistic approach to total eye regeneration, targeting dark circles, fine lines, sagging and puffiness.

sans âge **eye revise** works at a cellular level to effectively create visible improvement to the appearances of the skin and long-term functional results. The outstanding combination of ingredients in sans âge **eye revise** offers the following benefits:

- **Helps revise wrinkles and fine lines**
- **Hydrates, smoothes and softens eye tissue**
- **Reduces the appearance of dark circles and puffiness**
- **Deflects light from reaching and harming the capillaries around the eyes**
- **Reduces the appearance of tired or ageing eyes through light refraction technology**
- **Promotes normal cell proliferation**

WHO SHOULD USE **eye revise**?

sans âge **eye revise** is highly recommended for men and women of all ages. It is particularly beneficial for anyone experiencing or trying to prevent any of the following eye conditions: fine lines, dark circles or puffiness.

DIRECTIONS FOR USE:

1. Cleanse the face with your sans âge cleanser
2. For optimal results, apply sans âge **transdelivery C** around the entire eye area before application of **eye revise**
3. One pump of **eye revise** should cover both eyes. Lightly pat onto entire eye area, then lightly smooth and massage into skin on both upper & lower lids, under eye, above brow, and the sides where crow's feet would occur
4. Allow **eye revise** to absorb before applying your other sans âge target area products

KEY INGREDIENTS:

Ascorbyl glucoside

A stabilized form of vitamin C that assists to regulate melanin and encourage collagen production.

Acetyl hexapeptide-8

A synthetic peptide temporarily blocks the release of neurotransmitters that cause muscle contractions. Has been shown to reduce the depth of wrinkles up to 30% after 30 days of trial use*.

Beta carotene

An anti-ageing micronutrient and a precursor to vitamin A which is essential to eye health. Beta-carotene is lipolytic and along with turmeric, creates the natural color for eye revise.

Turmeric

Contains curcuminoids, powerful anti-inflammatory phytochemicals that act as natural cox-2 enzyme inhibitors. This helps stop prostaglandin production that can cause swelling of tissue.

Beta glucan

Stimulates the Langerhans cells to improve cellular immune functions.

Hyaluronic acid

Hydrates tissue and promotes cellular function.

Asiatic acid

Shown to stimulate the fibroblast cells to produce collagen and assist in strengthening capillaries.

Squalane

Helps reduce inflammation and tissue swelling.

Hippophae rhamnoides oil

A nutrient rich oil known for its healing properties which help revise fragile capillaries often contributing to the dark circles under the eyes.

Phytonadione

Vitamin K sourced from green leafy vegetables and fruits such as kiwi and avocado. Helps generate cellular activity through the energy source ATP and is also known to strengthen capillaries, the blood veins that supply the eyes with nutrients.

Titanium dioxide

A physical UVA/UVB reflector that provides the skin with sun protection.

* Source: International Journal of Cosmetic Science, Vol. 24, No 5. P. 303 (October 2002). Currently, doctors are beginning to recommend use of Acetyl hexapeptide-8 skin serums in conjunction with paralytic injections to prolong those results.
